

2026 Rocky Mountain Wildfire Smoke Symposium

**National problem, local solutions:
community wildfire smoke preparedness**

Event highlights

► **What to expect**

There will be collaborative panels, guest speakers, and interactive workshops focused on advancing practical, community-centered solutions to reduce impacts of wildfire smoke.

► **Networking**

Find opportunities during lunch discussions, a poster session, and an evening happy hour.

► **Hybrid attendance option**

While we would love to see you in person, a live-stream option will be available for remote participants.

► **Registration information**

Thanks to sponsorship from CDPHE through generous funding from EPA, this year's registration will be partially subsidized to encourage participation of government partners, community organizations, researchers, public health and emergency management professionals, and others working in the wildland fire space. Travel sponsorship may also be available for some attendees. More details to come!

We want to hear from you!

We invite you to contribute to the symposium. Fill out the [survey](#) to let us know what you are interested in learning more about or contributing to the symposium this year!

Oct. 15-16, 2026

Colorado Department of Public
Health and Environment's
Glendale campus
